Tao Yang

- Independent Consultant
- System Center and OMS
- SCOM Management Pack Developer
- PowerShell Since Version 1.0
- Co-Author of the *Inside Microsoft Operations Management Suite* book
- MVP – Cloud and Datacenter Management

Agenda

- OMS Data Injection Overview
- OMS HTTP Data Collector API
- OMS Custom View Designer
- Demo
- Q&A – Giving away a copy of the *Inside OMS* book.

OMS Data Sources – As of today

Agent Based

- Windows
- Linux
- Docker Container

API Based

- Azure services
- Office 365
- Application Insights (App Insights)
- SysCtr ConfigMgr
- Windows Telemetry
- **HTTP Data Collector API**
- Much more to come...

OMS Data Collector HTTP API

- Newly released HTTP based API
 - Using HTTP POST method
- Authenticate using OMS Workspace ID and access key (primary / secondary)
- Define your own log schema and fields data types
 - String | GUID | Double | Boolean | Date/time
- Leverages OMS Custom Fields
 - Also in Preview at the moment
 - Currently limited to 100 custom fields per workspace

OMS Data Collector HTTP API

■ Documentation

- <https://azure.microsoft.com/en-us/documentation/articles/log-analytics-data-collector-api/>

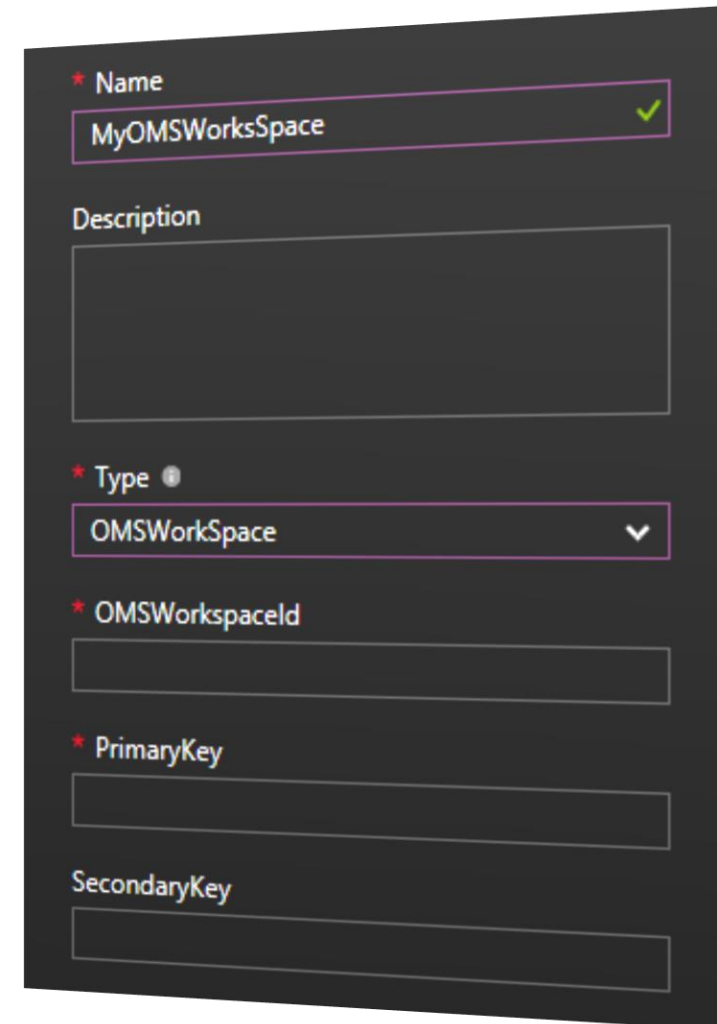

■ Product Group Blog Post

- <https://blogs.technet.microsoft.com/msoms/2016/08/30/http-data-collector-api-send-us-data-from-space-or-anywhere/>

OMSDataInjection PowerShell Module

- Wrapped the HTTP API into a PowerShell module
- Standalone PowerShell Module
- Also Compatible with Azure Automation or SMA
- Author: Tao Yang

A screenshot of a PowerShell module form for OMSDataInjection. The form is dark-themed with white text. It contains the following fields:

- Name:** A text input field containing "MyOMSWorkspace" with a green checkmark icon to its right.
- Description:** A large, empty text area.
- Type:** A dropdown menu showing "OMSWorkspace" with a downward arrow.
- OMSWorkspaceId:** An empty text input field.
- PrimaryKey:** An empty text input field.
- SecondaryKey:** An empty text input field.

OMSDataInjection PowerShell Module

■ Syntax:

```
$PrimaryKey = Read-Host -Prompt 'Enter the primary key'
$ObjProperties = @{
    Computer = $env:COMPUTERNAME
    Username = $env:USERNAME
    Message = 'This is a test message injected by the OMSDataInjection module. Input data type:
PSObject'
    LogTime = [Datetime]::UtcNow
}
$OMSDataObject = New-Object -TypeName PSObject -Property $ObjProperties
$InjectData = New-OMSDataInjection -OMSWorkspaceId '8fb61d08-12ac-400a-a45b-0e607994779f' `
-PrimaryKey $PrimaryKey -LogType 'OMSTestData' `
-UTCTimeStampField 'LogTime' -OMSDataObject $OMSDataObject
```

OMSDataInjection PowerShell Module

■ Using it in an Azure Automation runbook:

```
$OMSConnection = Get-AutomationConnection 'OMSConnection'
$OMSDataJSON = @"
{
    "Username": "administrator",
    "Message": "This is a test message injected by the OMSDataInjection module. Input
data type: JSON",
    "LogTime": "Tuesday, 28 June 2016 9:08:15 PM",
    "Computer": "SERVER01"
}
"@
$InjectData = New-OMSDataInjection -OMSConnection $OMSConnection `
-LogType 'OMSTestData' -UTCTimeStampField 'LogTime' -OMSDataJSON $OMSDataJSON
```

OMS Custom View Designer

- Design Your Own views
- Based on Existing Data
- Public Preview

Demo – SQL DB Migration Assessment Tool

- A real life example

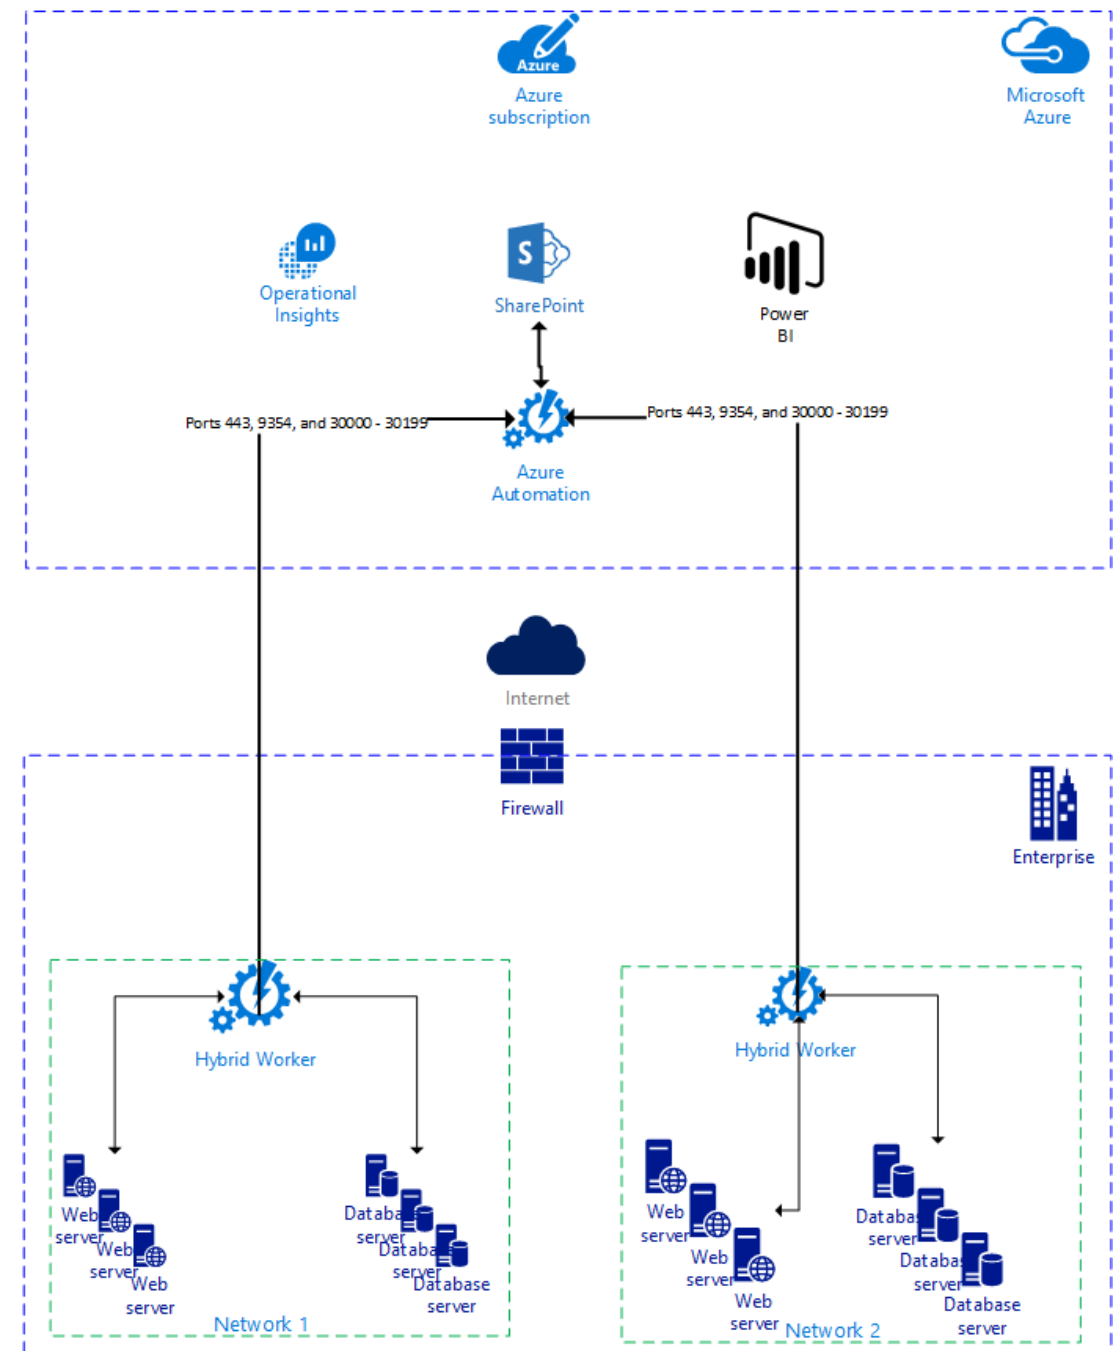

SQL DB Migration Assessment Tool

- A tool designed to assess the SQL database readiness for the following platforms:
 - Azure SQL Database (PaaS)
 - Azure Stack SQL Resource Provider (PaaS)
 - Azure Virtual Machines (IaaS)
 - Azure Stack Virtual Machines (IaaS)
- Evaluates readiness on the infrastructure level ONLY
- Use existing tools to check the DB schema compatibilities

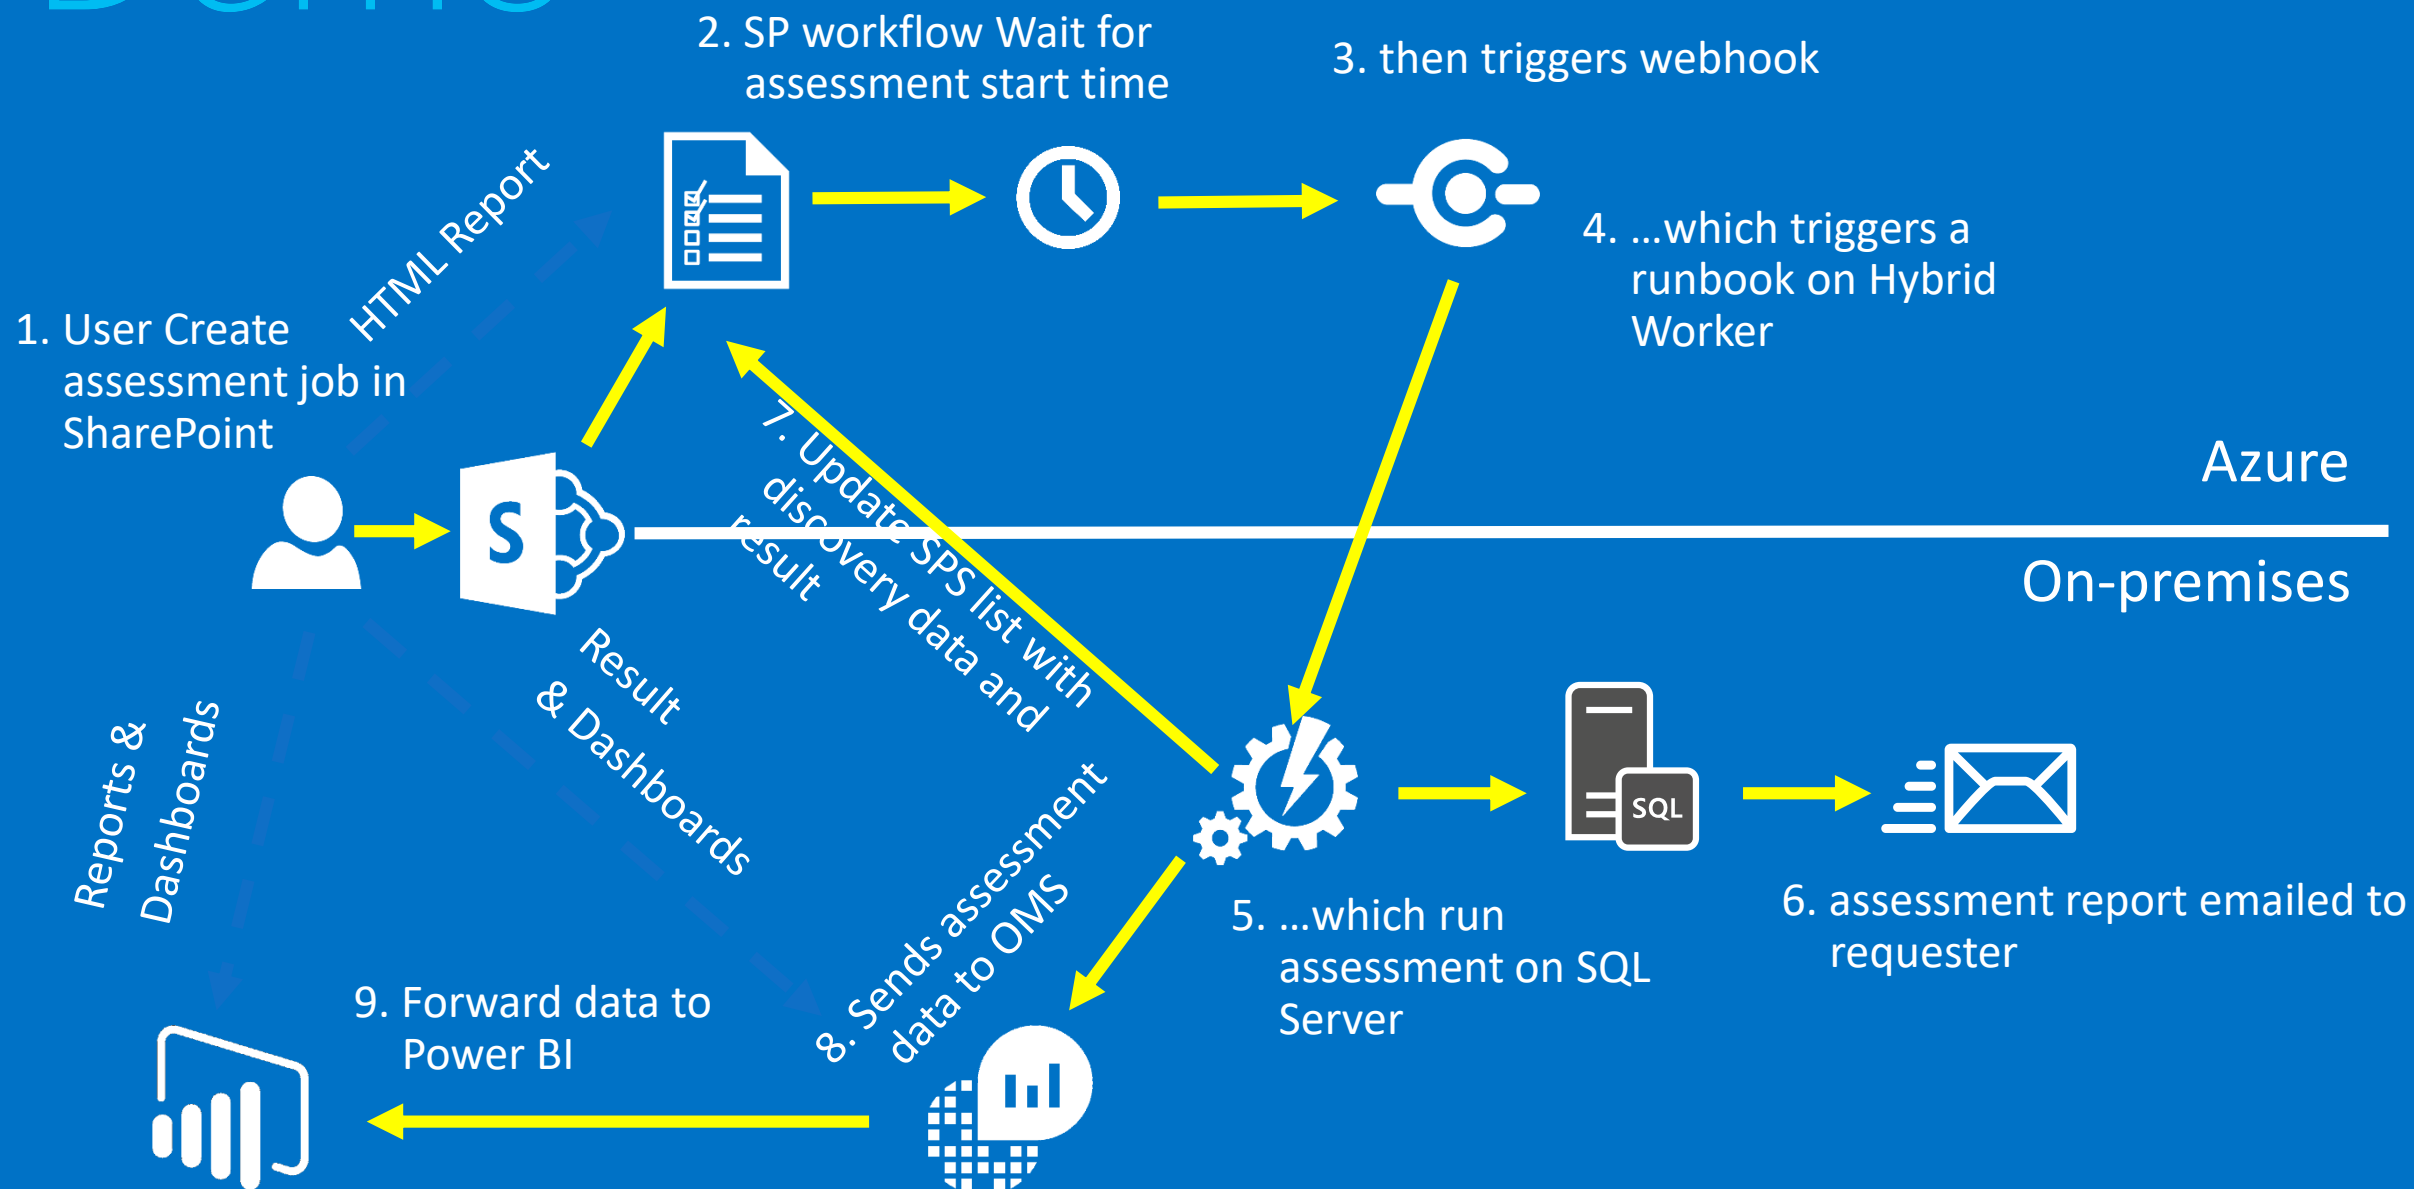

High Level Architecture

- SharePoint Online – Front End User Portal
- Azure Automation – Back End Processing Engine
 - Hybrid Runbook Workers
- OMS – Data Analysis and Visualisation
- Power BI
